PEE DEE ELECTRICCOVID-19 REPAYMENT PLANS

Per Governor Cooper's executive order 142, utilities suspended disconnects for nonpayment until July 29, 2020. Pee Dee Electric will continue to suspend disconnects for nonpayment until September 1, 2020. No late fees will be charged until 2021.

Below, members can find three options that can be used to repay the past due amount.

You must speak with a Member Service Representative to establish your preferred option. If Pee Dee Electric has not heard from you, you will automatically be enrolled in the COVID Repayment Plan outlined below in Option 3.

Option

1

You can pay the full amount due on the August billing statement. This includes the current and past due amount.

Option

2

Convert your account to a prepay plan, which allows you to use any existing security deposit to the past due debt. 15% of all payments made will go towards the past due debt for six months. After six months, 25% will go towards the past due.

Option

3

You can agree to a COVID Repayment Plan. This plan will allow you to pay the past due balance in equal monthly installments over the next nine months with no interest charges or late fees.

The entire past due amount associated with the COVID Repayment Plan must be paid in full by May 31, 2021. Failure to pay the entire past due amount by this date will result in interest fees and penalties being added to the balance, and may result in disconnection of service for non-payment.

9 Months to Repay Any billed amounts due after September 2020 must be kept current, including the required installment payments related to the *COVID Repayment Plan*.

If your account becomes delinquent, becomes subject to disconnection, or if the account is canceled for any reason, the entire balance is due immediately.

Example: If your account is \$200 past due, you will pay \$22 each month beginning in September.

\$200 past due amount / 9 months

\$22 payment per month + current balance

due
